

Quality Since 1974

EXCEEDING YOUR EXPECTATIONS THROUGH SUPERIOR WORKMANSHIP AND DESIGN

Full-Length Vinyl V-Bunk & Motorstop

The V-Bunk features an aluminum channel and extruded vinyl. The aluminum brackets and channel allow you to make simple adjustments and conform the V-Bunk to any boat hull shape. Pier Pleasure's standard mounting brackets have the necessary clearance needed for the in-board shaft on ski boats. The end of Pier Pleasure's V-Bunk is curved to reduce wear points and protect the hull of your boat.

With a motorstop installed on your boat lift, you can safely position your boat with ease. Extruded vinyl is installed to protect the lower unit of your motor.

Full-Length Vinyl Guide-Ons

These guide-ons are made from aluminum channel and covered with extruded vinyl. Flared ends allow for easier entrance into the boat lift. They are adjustable both vertically and horizontally.

Lift Jack

The lift jack is a great helping hand when making adjustments to the lift legs or when installing wheels for installation and removal of your boat lift. The lift jack is 6 feet tall.

BOAT LIFT ACCESSORIES

Wheel Kits

Using wheels when installing and removing a boat lift will make the job easier in most situations. Bracket kits are available to install on any additional lifts and use the same wheels. The plastic wheels may be left on after installation or removed if shallow water conditions require. Lift legs must be lowered into position after installation. The wheels are not intended to provide support while the boat is on the lift.

Flared Pontoon Guide-Ons

Flared Pontoon Guide-Ons will give you confidence to drive your pontoon onto the lift with ease. Simply line up the front of the pontoon and the guide will keep you straight as you drive onto the boat lift. The low-profile design of the guides allow you to easily enter the pontoon without any interference.

Pontoon Centering Rack

Transform your standard lift into a pontoon lift with the heavy-duty Pontoon Centering Rack. The bracket and hardware allow you to adjust the rack to your desired height. The rack lifts under the deck and guides the pontoon as you drive onto the lift. The 2" x 10" wood is not provided.

Diagonal Step

The aluminum diagonal step with skid resistant tape will assist you as you climb from the dock into your boat. Attaches to the side diagonal of a Pier Pleasure vertical boat lift. Adjustable to the height that you desire.

Bunk Step

The aluminum bunk step with skid resistant tape will assist you as you climb from the dock into your boat. Attaches to the side bunk beam of a Pier Pleasure vertical boat lift. Adjustable to the height that you desire.

Battery Tray

The aluminum battery tray can be attached to the vertical lift diagonal. This will allow you to have the battery close and convenient to the power unit. Available sizes for Series 24 and Series 27 Deep Cycle Batteries.

Bow Stop

The bow stop will assist you in positioning your ski boat into the proper location on the lift. The bow stop is adjustable to accommodate the many designs and styles of boats.

Vertical Lift with Double Centering Guides

See www.pierpleasure.com for new and additional lift accessories.

Centering Guides

Centering Guides provide a simple way of positioning your boat and prevent damage to the boat's exterior. Available as a pair of Single Centering Guides or a pair of Double Centering Guides. Easy installation and adjustments make Centering Guides a good choice to protect your investment.
